

**Amendment to the Abstract**

Please replace the Abstract as follows:

Payee names in received financial statements can be substituted for the benefit of users. The financial statements can be electronically received from a financial services provider. The financial statements typically comprise transaction entries that comprise an original payee name. A user can indicate a preferred name for the original payee name. If a match exists between an original name and a preferred name, the preferred name can be substituted for the original payee name. If a match does not exist, an active payee table can be used to display an original payee name.
